

PRODUCT OVERVIEW

Keep every program on schedule and on record.

A task board built for defense program teams.

Dimitrios Kalligaridis · ITC 4214 Internet Programming · June 2026 · retryoos.github.io/task-dashboard

THE PROBLEM

Program work lives everywhere, and things slip.

Research, procurement and maintenance get tracked across email, spreadsheets and sticky notes. With no single place to look, due dates pass and sign-offs get missed.

Scattered. Work is spread across tools that do not talk to each other.

No clear priority. Everything looks equally urgent.

No visibility. There is no quick read on what is done and what is left.

THE SOLUTION

One board for the whole program.

Every task in one place, with an owner, a due date, a priority and a status. Add it, track it, mark it done.

TASK BOARD

Manage program tasks

Add a task with a due date and priority. Tasks are saved in your browser and stay after a refresh.

7
Total

4
Pending

3
Completed

Add a task

Task name

Description

Due date

Tasks

All statuses

All priorities

Sort by due date

Task	Description	Due date	Priority	Status	Actions
Maintenance log cleanup	Tidy and archive the 2025 maintenance logs.	2026-05-28	LOW	Completed	
Q2 compliance report	Submit the quarterly ITAR compliance report.	2026-06-04	HIGH	Completed	

WHAT YOU GET

Built to keep teams moving.

Clear priorities

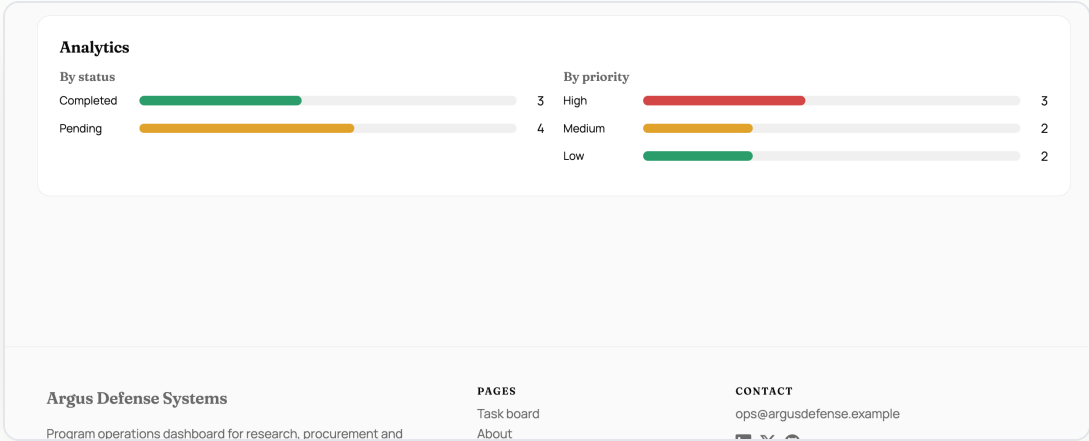

High, medium and low are colour coded, so the urgent work stands out at a glance.

Filter and sort

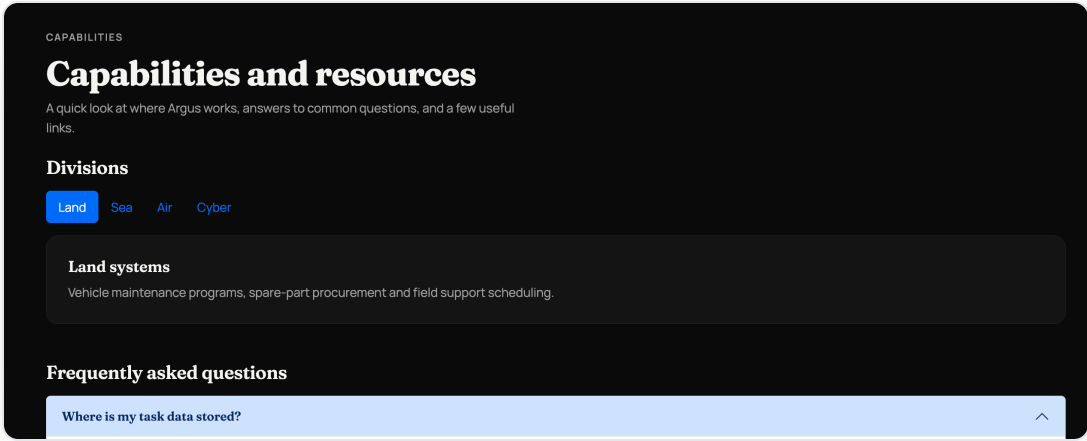

Narrow by status or priority and sort by due date or name, with no reload.

Progress, not guesswork

A live summary and bar charts show how the workload is split.

At-a-glance analytics

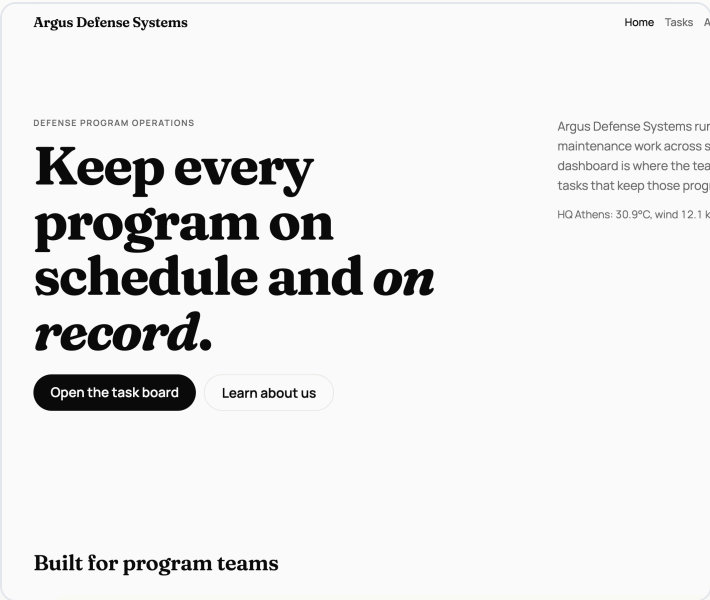

Dark mode, on any device

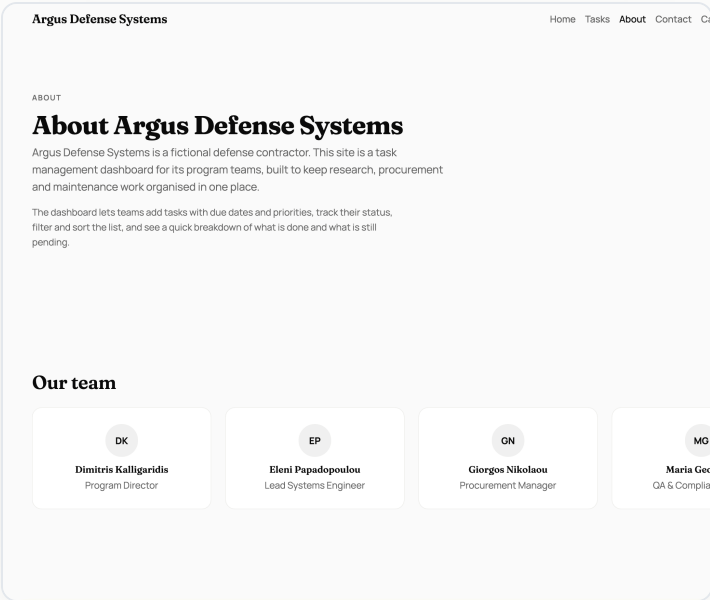

LIVE

See it in action.

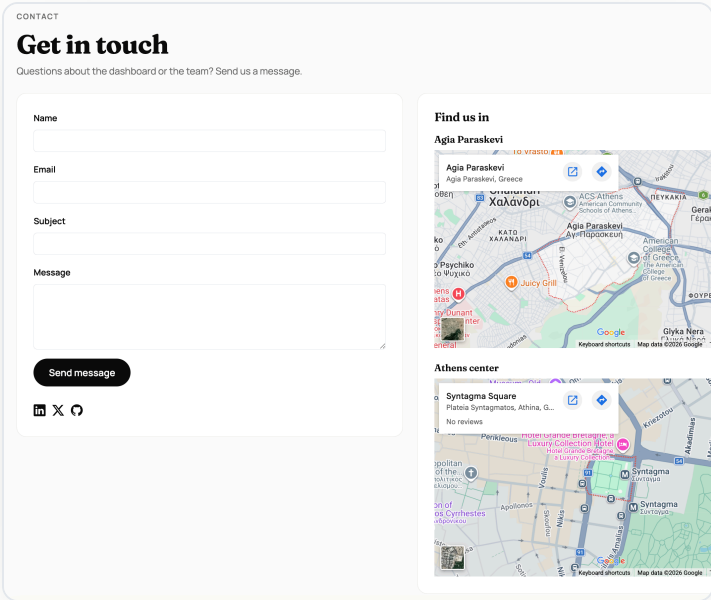

It runs right in the browser, with nothing to install. Open it and add your first task: retryoos.github.io/task-dashboard
